Comments:

Very interesting and informative!

David Gunter’s information was very interesting – The BPS assessment sounds intriguing too!

We missed hearing you talk Mr. Gunter – much love from El Paso, Texas!

I think this was well presented

Some difficulty in hearing

Great presentation – great information – great organizational skills and great teamwork!! Thank you!!

This session was very informative – it also gave me a different outlook and perspective of people who have mental health needs – I also enjoyed the approach of looking and thinking of mental health issues differently

This will help me build a good rapport with my peers and how to create a better plan of resources to help my peers

Some fonts on powerpoint were very tiny to read – Overall information was useful – Great voice projection – examples were very helpful

Really good session – all sessions should be limited to 1 hour and 15 minutes max

Very informative – more energy could be helpful

Great presentation – good for big Centers with professional staff – it seems to be for high level individuals – what happens between a crisis and enrollment in OBI which can hopefully address the behaviors, psychosis, depression – How much funding is needed to explore and work with each individual?

How does a patient get accepted into OBI program (other than just on assessment) Any rule outs?

I don’t understand what is different than just good assessment and planning

Enjoyed David’s presentation – looking forward to this being rolled out statewide

It is always great to review and discuss this content

Very good information – can't wait to use with clients

Good presentation but not what I expected/needed

Very informative – very though provoking

Great topic but the format was not conducive in my opinion – Too many words on slides – success stories are good but what does this look like within the diversion/department structure funding? How to set this up at my Center?

Requirements for staff

Rock On! You all represented the OBI programs wonderfully! It is exciting that all 5 Centers are running these programs under same mission and philosophy. Great work

I'm partial but the presentation was very good – maybe we can explain OBI rural vs city requirements (challenges) –

Very good and quite informative
