Comments:	
	Great discussion.
	I enjoyed learning about the It world in Healthcare
	She was good and her information was information but she did not keep my attention. Too much about herself. Erin was great!
	Talking about AI was great. However, she needed to keep it to that. Discussing MRNA vaccines and the fact that most Americans didn't get them due to "misinformation" is her opinion.
	She would have been great if she spoke from her experience in rural West Virginia. She was too coached and unrelatable.
	very difficult to hear. The format did not engage audience
	Great job! I enjoyed the I formation and will be sharing with my district
	Very inspiring to see how much the speaker has accomplished.
	would have preferred it to be a presentation as opposed to a question and answer session
	Great meeting. Audio was difficult to understand at times due to low tone.
	Great presentation. Good and helpful materials.
	Content was excellent. Erin was also very funny and was just as engaging and articulate as the actual presenter.
	Great session, I would have loved it to be longer. Also, I wish her book would have been available for purchase/signing.
	Very interesting
	Great topic

	I think the speaker was very knowledgeable. However, the presentation of the material was not engaging. Several people left.
	Presentation was informative
	She made biased comments (pushing mrna vaccines) this upset people in the audience.
	yes we need to promote our center.
	Great job so far
	What a great way to start the conference! This excellent discussion perfectly framed the key challenges we face every day. Kudos!
	Enjoyed the session, very informative discussion. Speaker shared alot of know with audience. Great questions were asked to provide information to audiences.
	Good information.
	Had difficulty hearing and understanding speakers. Training is needed that when using amplification speech cadence needs to be slower and enunciation increased
